Subject Index

a_1 Acid-glycoprotein, role in cortical bone, 208
a_2 HS-glycoprotein, role of plasma proteins in human cortical bone, 208
Absorptiometry. *See* Dual photon absorptiometry
Acetazolamide
  effect on disuse atrophy, 126
  stimulation of carbonic anhydrase by PTH, 646
Acidic glycosaminoglycans, distribution associated with calcification in predentine, 36
Acidic phospholipids, role in human atherosclerotic aortas, 121
Acidosis. *See* Uremic acidosis
Acid phosphatase at the PTH-activated osteoclast ruffled border, 526
Adenylate cyclase, skeletal, affected by Mg^{20}, Ca^{2+}, and PTH, 319
Aging, renal responnses to synthetic PTH (1–34) related to, 357
Alcoholism, increased blood cortisol in patients with aseptic necrosis, 585
Alkaline phosphatase,
  stimulation by PTH, 530
  effect of aging on bone formation, 617
Aluminum,
  interactions with vitamin D_3, 484
  dissolution of calcium hydroxyapatite, 673
Aminohydroxypropylidene bisphosphonate, inhibiting role in bone turnover, 268
Amorphous calcium phosphate, 401
AMP, cyclic. *See* Cyclic AMP
Anhydrase. *See* Carbonic anhydrase
Antibody, monoclonal, phosphophoryn in predentin and dentin, 491
Anticonvulsants, effect on vitamins and bone metabolism, 218
Antigens, cell surface, 46
Aorta, human atherosclerosis, 121
Apatite,
  substitution of hydroxyl by carbonate ions in dental enamel, 372
  calcium phosphate formation in metastable solutions, 390
  microbeam diffraction of, 651
Aragonite, precipitation of calcium carbonate polymorphs, 174
Aseptic necrosis, relation to increased blood cortisol, 585
Atherosclerosis, aortic calcification, 121
Autoradiography,
  role in localization of bovine PTH, 441
  glycoaminoglycans in predentine and dentine, 511

β_2 microglobulin, effect of calcitonin on, 367
Basal cells, demonstration of $1,25(OH_2)D_3$ receptors in, 255
Bioassay, comparison of PTH levels in hypophosphatemic mice, 418
Biological mineralization, rate-limiting factor of P pool size, 293
Biomechanics, effects of Ca intakes and lack of PTH function, 608
Biomineralization, octacalcium phosphate formation *in vitro*, 91
Blood-ionized calcium. *See* Calcium
Bone,
  increased formation following removal of marrow, 551
Bone analysis, comparative, via inflammation-mediated osteopenia, 539
Bone blood flow, measurement by clearance of bone-seeking tracers, 312
Bone density, using gamma-ray computed tomography, 19
Bone disorders in spontaneously hypertensive rats, 605
Bone Gla-protein. *See* Gla-protein
Bone growth, pharmacologically induced changes in, 19
Bone healing, recovery from rickets, 478
Bone histomorphometry. *See* Histomorphometry
Bone, human, characterization of, 228
Bone, human cortical, role of plasma proteins, 208
Bone induction. *See* Induction
Bone loss, effects of prednisone and deflazacort on, 581
Bone marrow, increased formation of bone and cartilage, 551
Bone marrow cultures. *See* Marrow
Bone mass regulation by mechanical strain magnitude, 411
Bone mineral content,
  actions of vitamins D_2 and D_3, 218
  cortical and trabecular bone, 340
  effect following gastric surgery, 461
  increase following bromociptine treatment, 687
Bone mineralization, AHPrBP inhibition of $1,25(OH)_2$ vitamin D_3-induced bone turnover, 268
Bone morphometry, inhibition by AHPrBP of $1,25(OH)_2$ vitamin D_3-induced bone turnover, 268
Bone remodeling,
  regulation of mass by mechanical straing magnitude, 411
  mechanical stretching, 431
  cortical, effects of estradiol on, 437
Bone resorption. *See* Resorption
Bone resorption in an acidic environment, 547
  role of thionapthene 2-carboxylic acid, 556
Bone-specific proteins, cells *in vitro*, 453
Bromocriptine, treatment of hyperprolactinemia, 687
Brushite formation from amorphous precursor, 401

Ca-acidic phospholipid-phosphate, unassociated with osteocalcin, 57
Calcifiable matrix,
  cross-linked polypentapeptide of elastin, 565
Calcification,
  aortic, 120
  foreign body stones, 165
  role of octacalcium phosphate in, 329
  formation of brushite, 401
  role of proteoglycans in inhibition of, 560
  molecular weight dependence, 565
Calcification fronts, relation to tetracycline labeling, 32
Calcification potential, molecular weight dependence, 565
Calcite, present in calcium carbonate, 174
Calcitonin,
  role in rats and whole-body irradiation, 42
  effect on clonal cell line, 51
  use as antiosteolytic drug, 105
  effect on degredation of calcified collagen, 300
  effect on serum $\beta_2$microglobulin, 367
  effect of exercise on mineral metabolism, 598
  effect in Paget's disease, 577
  role in cardiovascular action, 581
Calcitonin gene-related peptide, role of in cardiovascular action, 581
Calcium,
  effect on skeletal adenylate cyclase, 318
  abnormal parathyroid function, 418
  interactions between aluminum and vitamin D_3, 484
  effect of exercise on mineral metabolism, 598

effect of aging on bone formation, 617
Calcium absorption, isotopic, classification of hypercalciuric patients, 467
Calcium-acidic-phospholipid-phosphate, role in initiation of hydroxyapatite formation, 285
Calcium ATPase,
measurement *in vitro*, 602
Calcium binding,
measurement *in vitro*, 602
Calcium, blood-ionized, effect of $1,25(OH)_2$ D_3 on circadian mineral rhythms, 351
Calcium carbonate, precipitation of, *in vivo*, 174
Calcium homeostasis, affected by PTH and $1,25(OH)_2D$, 461
Calcium hydroxyapatite, affected by aluminum, 673
Calcium load, classification of hypercalciuric patients, 467
Calcium metabolism in male puberty, 213
Calcium phosphates,
formation in extracellular fluid, 91
ethanol-induced formation of, 189
liposome mediated in metastable solutions, 390
Calcium/phosphorus, concentrations in normal and posttraumatic osteopenia, 117
Calcium supply, effects of Ca intake and lack of PTH function, 608
cAMP,
levels in fibroblasts, 178
renal response to PTH (1–34) and aging, 357
Capacitative plate experiments, use of electromagnetic fields, 198
Ca/P ratio, implications for bone formation, 91
Carbonate,
relation to citrate in cortical bone, 363
for hydroxyl substitution, 372
Carbonic anhydrase,
role in bone, 126
role in bone resorption induced by 1,25 Dihydroxy vitamin D_3, 134
stimulation by PTH, 646
Caries, dolomites in tooth enamel, 376
Cartilage,
localization of bovine PTH by autoradiography, 441
increased formation following removal of marrow, 551
excision of the perichondrial ring, 677
Cartilage calcification, role of vitamin D, 82
Cell culture, characterization of human bone, 228
human bone cells *in vitro*, 453
Cell uptake. *See* Uptake
Characterization, bone matrix proteins of, 63
Chemotaxis,
methods of extraction, 63
Chondrocytes,
growth plate, role of bone induction by xenografts, 250
localization of bovine PTH by autoradiography, 441
Circadian mineral patterns, relation to $1,25(OH)_2D_3$, 351
Citrate, relation to carbonate in cortical bone, 363
Citric acid, role in fluorine concentration changes, 381
Collagen,
degredation in pycnodysostosis, 25
promotion of, in bone-marrow fibroblasts, 178
unusual, induced following vinblastine i.v., 501
Collagenolysis, evidence for two mechanisms leading to, 300
Compound 48/80, inhibition of bone resorption *in vitro*, 447
Cortical bone, relation to trabecular bone, 340
Cortical bone remodeling, effect on, by progestogen treatment, 282
Corticoendosteum, resorption and formative characteristics of, 665
Cortisol, increase in alcoholic patients with aseptic necrosis, 585
Creatine kinase BB, regulation of activity in sarcoma cell clones, 635
Cyclic AMP, response to PTH and SCT, 51

Deflazacort, effect on vertebral bone mass, 581
Degredation, role of nonenzymatic mechanisms in dentin, 236
Demineralization, dolomites in tooth enamel, 376
Demineralized bone matrix,
effect of aging on bone formation, 617
Denervation-induced bone loss, role of acetazolamide, 126
Densitometry, bone, applied to osteogenesis imperfecta, 14
Density, measurement of mechanical properties, 73
Density fractionation, mineral and matrix alterations in o rats, 285
Dental enamel,
substitution of hydroxyl by carbonate ions, 372
role of dolomite in, 376
Dentin,
phosphophoryn distribution in, 491
collagen aggregates following vinblastine i.v., 501
(^{35}S)sulfate and (^{3}H) glucosamine in, 511
Dentin, human, compositional changes, 236
Dentinogenesis, process of, 242
Diabetic bone matrix, role of demineralized bone matrix, 630
Differentiation,
activation profiles, 51
1,25 dihydroxyvitamin D_3 and osteoblast alkaline phosphatase, 639
Diffraction, microbeam, study of enamel apatite structures, 651
Dissolution, of calcium hydroxyapatite by aluminum, 673
1,25-Dihydroxyvitamin D,
concentrations in premature infants, 223
effects on circadian mineral rhythms, 350
influence following gastric surgery, 461
osteoblast alkaline phosphatase, 639
role of in hypercalcemic pulmonary TB patients, 588
1,25 Dihydroxyvitamin D_3,
inhibited by AHPrBP in bone turnover, 268
role in increase of osteoclastlike cells in cat marrow, 276
1,25 Dihydroxyvitamin D_3 receptors, characterization of in basal cells, 268
24R,25 Dihydroxyvitamin D_3, regulation of creatine kinase activity in sarcoma cell clones, 635
1α,25 Dihydroxyvitamin D_3,
regulation of creatine kinase activity in sarcoma cell clones, 635
role of, in effect of prednisolone on kidney calcification, 613
Dipeptidyl-aminopeptidase, properties of, related to osteoblasts, 183
DNA, effects of mechanical stretching on, 431
DNA synthesis, inhibition of osteoblast growth by PTH, 519
Dual photon absorptiometry, effect of glucocorticoids on bone mass, 581

EGTA, ionized measurement *in vitro*, 602
Elderly patients, prevention of hypovitaminosis D in, 112
Electrolytes, intracellular, effect by Ca^{2+}, 401
Electromagnetic fields, pulsed,
in promotion of collagen production, 178
in biological studies, 198
Electron microprobe, investigation of calcium and phosphorus concentration, 117

Electron microscopy,
study of foreign body stones, 165
unusual collagen aggregates, 501
Embryonic chick chondrocytes and role of vitamin D, 82
Enamel,
defect structures in, 651
Endochondral bone formation,
induction by demineralized bone matrix, 630
Endochondral ossification, role of proteoglycans in, 560
Epiphyseal cartilage, morphochemical analysis of phosphorus pools, 293
Escape phenomenon of osteoclasts, 42
Estradiol, effects on cortical bone remodeling, 437
Exercise, effect on mineral metabolism, 598
Extracellular matrix, human bone cells *in vitro*, 453

Femoral neck, bone mineral content of, 340
Femoral shaft, bone mineral content of, 340
Fibroblasts, affected by pulsed electromagnetic fields, 178
Fluorine, changes following citric acid treatment, 381
Foreign body stone, developmental morphology, 165
Formation, bone. *See* Prostaglandins
Fractures, three-dimensional trabecular microstructure study of, 594
Freeze substitution, glycoaminoglycans in predentine and dentine, 511
Freezing, rapid, glycoaminoglycans in dentine and predentine, 511

Gallstones, precipitation of calcium carbonate polymorphs, 174
Gamma-carboxylated glutamate, role of vitamin K in promotion of, 143
Gastric surgery, influence on calcium homeostasis, 461
Gla-protein,
implication in the ossification process, 57
effect of aging on bone formation, 617
immunohistologic localization, 684
Glucocorticoids, effect on kidney calcification following vitamin D treatment, 613
Glycosaminoglycans,
synthesis effecting embryonic chick chondrocytes, 82
(^{35}S)sulfate and (^{3}H)glucosamine in dentine and predentine, 511
Glycosaminoglycans, acidic. *See* Acidic glycosaminoglycans
Ground section, embedding methods of calcified tissue, 669

Growth plate,
changes following excision of perichondrial ring, 659

Heart, affected by calcitonin gene-related peptide, 581
Histology, bone, preparing bone-implant specimens, 572
Histomorphometry,
measurement in metabolic acidosis, 158
postovariectomy in rats, 324
paramaters in metabolic bone disease, 345
evaluation of bone and cartilage formation, 551
Human bone. *See* Bone
Hydroxyapatite,
affected by osteocalcin, 57
relation to calcium-acidic phospholipidphosphate complexes, 121
in osteopetrotic rats, 285
Hydroxylase, interactions between aluminum and vitamin D_3, 484
25-Hydroxyvitamin D, relation to hypercalcemia in TB patients, 588
Hypercalcemia,
relation to metabolic acidosis, 158
association with 1,25$(OH)_2$D in TB patients, 588
Hypercalcemia/hypocalcemia, effect of calcitonin on serum β_2 microglobulin, 367
Hypercalciuria,
classification by isotope calcium absorption, 467
effects of prednisone and deflazacort, 581
effects of vitamin K, 143
Hyperprolactinemia, role of bromocriptine treatment in, 687
Hypertensive. *See* Spontaneous hypertension
Hypophosphatemic (Hyp), response of tissue phosphate content, 423
Hypotension, effect of calcitonin gene-related peptide, 581
Hypovitaminosis D, prevention in the elderly, 112

IgE, role in human cortical bone, 208
Iliac crest, biopsies to determine calcification fronts, 32
Incisor, rat, unusual collagen aggregates following vinblastine i.v., 501
Indomethacin, effect on 1,25 dihydroxyvitamin D_3, 625
Induction, bone, by xenografts, 250
Inflammation-mediated osteopenia, comparative bone analysis, 539
Infrared spectroscopy, role in study of dental enamel, 372

Inorganic phosphorus, renal response and aging, 357
Interleukin-1, effect on calcium release and collagen degredation in bone, 300
Intersample variation for bone histomorphometric parameters, 345
Intestine, interactions between aluminum and vitamin D_3, 484
Intracellular electrolytes. *See* Electrolytes
In vitro,
role of carbonic anhydrase in bone resorption, 134
effects of thionapthene 2-carboxylic acid on bone resorption, 556
In vitro variables, use of vitamin D_3, 474
Ionized calcium,
measurement *in vitro*, 602
Iron uptake (Fe^2, Fe^3) by teeth and bones, 386
Irradiation, whole-body, inhibiting effect, 42

Lamella, study of osteonic inorganic phase, 659
Lattice parameter, subcutaneous heterotopic calcification, 329
Liposomes, role in calcium phosphate formation, 390

Macrophage,
increased number following ECT treatment, 42
cell lineage relationship to osteoclasts, 46
chemotactic factors, 63
resorption in acidic environment, 547
Magnesium,
effect on skeletal adenylate cyclase, 318
role of dolomite in tooth enamel, 376
Male puberty. *See* Puberty
Marrow, bone cultures, role of 1,25$(OH)_2D_3$ in increased osteoclast-like cells, 276
Matrix vesicles,
effect of acidic glycosaminoglycans on, 36
anionic liposomes' relation to precipitate formation, 390
precipitation of Ca^{2+}, 401
Mechanical properties, measurement and description of, 73
Mechanical strain, regulation of bone mass, 411
Mechanical stretching, role of DNA synthesis, 431
Medullary bone, acid phosphatase at the PTH-activated osteoclast ruffled border, 526
Membrane potential, affected by PTH, 307

Metabolic acidosis. *See* Uremic acidosis
Metabolic bone diseases, intersample variations for paramaters in, 345
Metalloproteinases, effect of mechanical stretching on DNA, 431
Metaphysis, excision of the perichondrial ring, 677
Methacrylate, embedding methods of calcified tissue, 669
Microangiography of bone, preparation of bone-implant specimens, 572
Microradiography of bone, preparation of bone-implant specimens, 572
Microspheres, radioactive, use as bone-seeking tracers, 312
Mineral content, measurement of the immature osteopetrotic bone, 73
Mineralization,
  active surface, 32
  relation to osteocalcin, 57
Mitochondria, precipitation of Ca^{2+}, 401
Molecular weight dependence, cross-linked polypentapeptide of elastin as calcifiable matrix, 565
Monoclonal antibody. *See* Antibody
Mossbauer spectra, study of iron uptake, 386

Nasal spray, salmon calcitonin effect in Paget's disease, 577
Nephrocalcinosis, effect of prednisolone, 613
Noncollagenous proteins, decomposition of phosphoserine and serine, in, 236
Nude mouse, induction of bone by xenografts, in, 250

Octacalcium phosphate,
  formation *in vitro*, 91
  role in subcutaneous heterotopic calcification, 329
Odontoblasts,
  role in biosynthesis of dentin phosphophoryns, 242
  distribution of phosphophoryn, 491
Oophorectomy,
  role of progestogen in, 282
  effects of estradiol on cortical bone remodeling, 437
  periosteal and corticoendosteal bone envelope activities, 665
Organ culture,
  use in study of dentinogenesis, 242
  role of compound 48/80 in bone resorption, 447
Osteoblasts,
  relation to bones and teeth, 4
  response to PTH and calcitonin, 51
  relation to properties of Suc-GPLCP-MCAase, 183
  characterization, 228
  increase in surface, postovariectomy, 324
  in vitro, 453
  inhibitory effects of PTH, 519
  stimulation of alkaline phosphatase by PTH, 530
  effect of 1,25 dihydroxyvitamin D_3, 639
Osteocalcin, effect on induced hydroxyapatite formation and growth, 57
Osteoclasts,
  biological mineralization, 4
  role in pyenodysostosis, 25
  escape phenomenon in bones of calcitron-treated rats, 42
  origin of, 46
  increase in surface postovariectomy, 324
  effect of calcitonin on serum β_2 microglobulin, 367
  acid phosphatase activity, 526
  stimulation of carbonic anhydrase by PTH, 646
Osteoclastlike cells, increase caused by $1,25(OH)_2D_3$, 276
Osteogenic sarcoma cells, regulation of creatine kinase activity in, 635
Osteogenesis,
  study of electromagnetic fields, 198
  mineral and matrix alterations in osteopetrotic rats, 285
  role of marrow removal, 551
Osteogenesis imperfecta,
  vertebral bone mineral content in, 14
  advances and controversies, 107
Osteoinductive potential, induction of endochondral bone, 630
Osteomalacia, effect of aluminum on dissolution of calcum hydroxyapatite, 673
Osteon, x-ray diffraction analysis of, 659
Osteonectin, immunohistologic localization, 684
Osteopenia, posttraumatic, calcium/phosphorus, role in, 117
Osteopetrosis,
  mechanical properties of, 73
Osteoporosis,
  placebo therapy, 6
  mineral and matrix alterations, 287
  regulation of bone mass, 411
  disorders in spontaneously hypertensive rats, 605
  role of three-dimensional microstructure study in, 594
Ovariectomy, skeletal alterations following, 324

Paget's disease,
  effect of calcitonin on β_2 microglobulin, 367
  effect of synthetic salmon calcitonin, 577
Parathormone, effect on calcium release and collagen degredation in bone, 300
Parathyroid hormone,
  effect on clonal cell line, 51
  role in calcium homeostasis, 307
  effect on skeletal adenylate cyclase, 318
  aging and renal response, 357
  abnormal function, 418
  localization by light microscope autoradiography, 441
  compound 48/80 effect on bone resorption, 447
  influence following gastric surgery, 461
  inhibitory effects on osteoblasts, 519
  activity of acid phosphatase, 526
  stimulation of alkaline phosphatase, 530
  inhibition of bone resorption, 556
  regulation of creatine kinase, 635
  effect of exercise on mineral metabolism, 598
  role in stimulation of carbonic anhydrase, 646
Parathyroids, lack of function effect on biomechanics, 608
Perichondrial ring, changes following excision, 677
Peridontal disease, fluorine changes following citric acid treatment, 381
Periosteum,
  effect of PTH on bone membrane electrical potential difference, 307
  resorption and formative characteristics of, 665
PGE_2, effects of mechanical stretching, 431
Phagocytosis, effect by osteoclasts, 25
Phosphate, response of tissue content, 423
Phosphate metabolism, measurement in epiphyseal growth cartilage, 293
Phosphophoryn,
  biosynthesis of, 242
  distribution in predentin and dentin, 491
Phosphorus, relation to abnormal parathyroid function, 418
Phosphoserine, *In vitro* decomposition, 236
Plasma Ca, changes induced by vitamin K deficiency, 143
Plasma proteins, in human cortical bone, 208
Plastic embedment of bone, preparation of bone-implant specimens, 572
Polymerization, methods of embedding calcified tissue, 669
Polypentapeptide of elastin, molecular weight dependence, 565

Posttraumatic osteopenia. *See* Osteopenia
Predentin,
phosphophoryn distribution in, 491
(^{35}S)sulfate and (^{3}H)glucosamine in, 511
Prednisone, effect on vertebral bone mass, 581
Premature Infants, serum 1,25$(OH)_2$D concentrations in, 221
Progestogen, role of treatment on cortical bone, 282
Proliferation, cell, role of 1,25$(OH)_2D_3$ in, 255
Prostaglandin E_2,
regulation of creatine kinase in sarcoma cell clones, 635
effect on 1,25 dihydroxyvitamin D_3, 625
Prostaglandins, effects on metaphyseal hard tissue and corticoendosteal bone formation, 148
Prosthetic biomaterial, polypentapeptide of elastin as calcifiable matrix, 565
Proteoglycans, role of in endochondral ossification, 560
Puberty, male, relation to bone turnover, 213
Pulmonary TB, hypercalcemia and 1,25 dihydroxyvitamin D in, 588
Pulsed electromagnetic fields, *See* Electromagnetic fields
Pycnodysostosis, phagocytosis of bone matrix, 25

Quantitative bone histomorphometry. *See* Histomorphometry

Remodeling. *See* Bone growth, bone remodeling
Renal cells, isolated, effects of prostaglandin E_2 and indomethacin, 625
Renal function, effect of prednisolone on, 613
Replication, inhibition of osteoblast growth by PTH, 519
Resorption,
bone, role of osteoclasts, 25
role of carbonic anhydrase in bone, 134
stimulation of collagenolysis in bone, 300
inhibition by compound 48/80, 447
Rickets, changes in vitamin D metabolites during recover from, 478

Scleroderma, role of OCP in subcutaneous heterotopic calcification, 329
Serine, *in vitro* decomposition, 236
Serum phosphate, relation to circadian mineral rhythms, 351
Side effects of synthetic salmon calcitonin, 577
Spectroscopy. *See* Infrared
Spontaneous hypertension and bone disorders, 605
Stone matrix, morphology of calcium oxalate foreign bodies, 165
Streptozotocin-induced diabetes, induction of endochondral bone, 630
Suc-GPLGP-MCAase, properties of, related to osteoblasts, 183
Surface activity, resorption and formative characteristics of periosteum and corticoendosteum, 665
Synchrotron radiation, analysis of osteonic inorganic phase, 659

Tetracycline labels,
relation to calcification fronts, 32
sites of bone formation, 324
preparation of bone-implant specimens, 572
Tissue preparation, role in ethanol-induced formation of solid calcium phosphates, 189
Tomography, computed, measurement of vertebral trabecular bone mineral concentration, 14
Toxicity, hypovitaminosis in the elderly, 112
Trabeculae, trauma and poor mineralization, 117
Trabecular bone, relation to cortical bone, 340
Trabecular microstructure, study in pathogenesis of fractures, 594

Ultrasound, use in osteopetrotic studies, 73
Uptake, cell, *in vitro* use of vitamin D_3, 474
Uremic acidosis, effect on calcium metabolism, 158
Urolithiasis, experimental morphology of foreign body stones, 165

Vaterite, present in calcium carbonate, 174
Vitamin D,
challenge agent for induced changes in bone density, 19
action on embryonic chick chondrocytes, 82
binding protein effect on basal cells, 255
resistant rickets, 423
metabolites' role in recovery from rickets, 478
and prednisolone effect on kidney calcification, 613
Vitamin D_2, actions on bone metabolism in phenobarbitone/phenytoin-treated patients, 218
Vitamin D_3,
role of its metabolite, 134
actions on bone metabolism in phenobarbitone/phenytoin-treated patients, 218
in vitro use of, 474
interactions with aluminum, 484
Vitamin K deficiency, hypercalciuria in rats, 143

Wound healing, role of electromagnetic fields in study of, 198

Xenograft, transplantation of growth plate chondrocytes from rabbits to mice, 250
X-linked hypophosphatemia, abnormal parathyroid function, 418
tissue phosphate content, 423
X-ray diffraction, analysis of osteonic inorganic phase, 659
X-ray power diffraction, pattern of OCP, 329
